

PRODUCT CATEGORY:
ATTACHMENTS/ACCESSORIES

PRODUCT NAME:
HU-COVID19-S

PRODUCT DESCRIPTION:
STERILE PVC SCREEN

Product Codes: HU-COVID19-S1, HU-COVID19-S2, HU-COVID19-S3, HU-COVID19-S4

Area of Use: Normal Care to High Care Wards, Intensive Care Units, Isolation Units and Trauma Units.

Intended Use: This screen is specifically designed to convert existing facilities to a more isolated patient environment and prevent cross infections from one patient to another. The framework for the HU-COVID19-S1 and HU-COVID19-S3 screens are secured to the existing ceiling structure and will be anchored via an innovative mounting bracket to the suspended ceiling structure, without adding any load to this structure.

The framework is manufactured from stainless steel grade 304 piping, where the uprights are dia 38mm and the horizontal piping is dia 25mm. The screen is manufactured from PVC sheeting 550g where the flaps and sleeves are all welded to allow for easy cleaning. The bottom and front tube are sleeved in the PVC screen and the back/top is stretched via the eye loops provided. A sealing strip is provided for the floor/wall and ceiling which will isolate the area in use.

The framework for the HU-COVID19-S2 and HU-COVID19-S4 screens are freestanding/mobile structures and can easily be moved between beds. The framework is also manufactured from stainless steel grade 304 piping, where the uprights are dia 38mm and the horizontal piping is dia 25mm. The screen is manufactured from PVC sheeting 550g where the flaps and sleeves are all welded to allow for easy cleaning.

HU-COVID19-S SPECIFICATIONS

SPECIFICATIONS:	HU-COVID19-S
Construction Screen:	Durable 550g PVC canvas sheefing (white or transparent options available).
